

# Facility Management

**ZMG is a world leader in the running and management of tennis facilities and resorts. ZMG has a number of “bases” around the globe and is constantly building on these. ZMG works together with the owners to bring a world class tennis program and experience to all members, guests and clients. ZMG’s turn key facility management services can help your club turn the corner and become profitable or transform your facility or resort into a sought after tennis destination.**

## **ZMG’s management program includes:**

### **Tennis Programming**

At each of their global bases ZMG introduces their signature tennis programs from their Grassroots Initiative through to Elite Training and High Performance Teams. These programs together with private and semi private lessons, adult programs, tennis events and pro shop ensure a world class tennis program and experience for all involved.

### **Tennis Events**

ZMG brings their signature tennis events to all bases they are involved with. These events are extremely personable offering that bit extra. More information regarding our events such as the ATP Experience and player parties can be found under the Events link on our global website.

### **Website**

ZMG believes that member and guest involvement is a key to creating an environment that encourages the great atmosphere at all ZMG locations. The individual “facility websites” are a big key to this. All members can log and see what is happening, register for classes, enter competitions and become part of the ZMG family.

### **Consulting**

ZMG also offers a consulting service whereby our executive team will advise your club on the best ways to turn around your current financial state. ZMG will train staff, advise the board and assist with a “reopening event” to create renewed excitement within the community.
